

Go To Catalog

Dss

To install Magento 2 GoToCatalog extension:

Step 1: Unzip the file.

Step 2:

Create a new directory: `app/code/Dss/GoToCatalog`. GoToCatalog is the module's internal identifier which can be found in the "composer.json" file of the downloaded compressed file. (Please see node "psr-4").

Step 3:

Upload to root file of your Magento installation to have this directory `rootfile/app/code/Dss/GoToCatalog`. The Magento root directory contains directories such as "app", "bin", "lib" and more. All directories should match the existing directory structure.

Step 4:

Go to Magento 2 root directory. Enter command line:

```
php bin/magento setup:upgrade
```

```
php bin/magento setup:static-content:deploy
```

```
php bin/magento cache:flush
```

1. How It work?

This Magento 2 extension allows the store owner to quickly preview the catalog (product & category) pages from the admin panel. And gives flexibility to the customers and the support & marketing team to visit the product page directly via SKU.

Key Features:

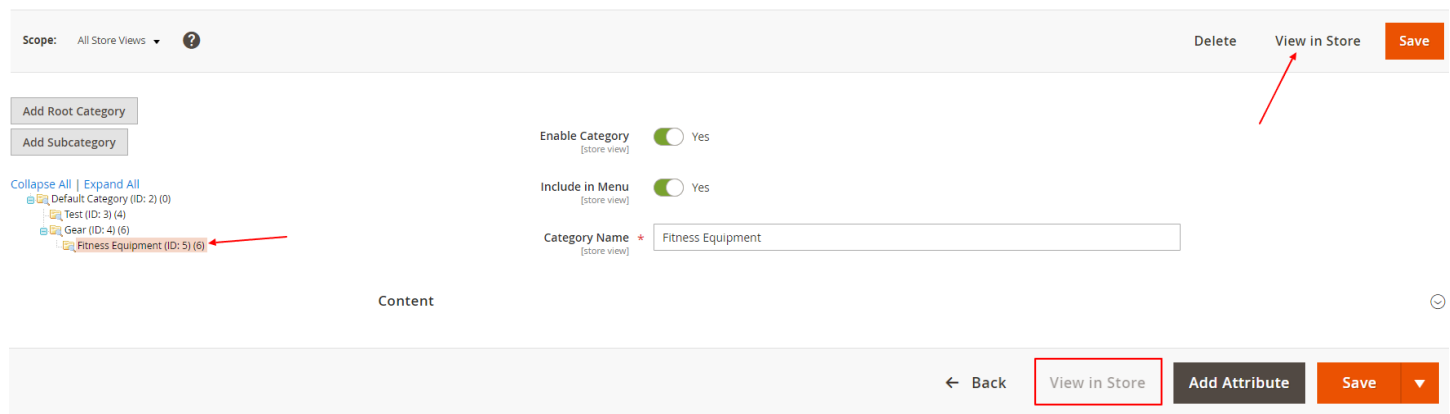

- Preview product page in the storefront (as per store) from Admin's product edit page
- Preview category page in the storefront (as per store) from Admin's category edit page
- Visit the product page directly via SKU in the URL

Feature Highlights

Quick Preview for Catalogs

With this extension, store admin can quickly explore the product & category pages via related edit pages, as per store.

- Preview option can be turned off from configuration
- Preview option is disabled if the product or category is not visible (disable or not visible individually)

Scope: All Store Views ?

Visit Product Page via SKU

Users can reach the product page directly via SKU in the URL.

- The prefix used in the URL can be configured from the extension configuration.
- If SKU is not found or not visible, it will redirect to the search result page with SKU as the search-keyword.
